EXPERIENCE

DraftKings [Casino Games Studio] Lead UX/Game Designer

Remote

Sep 21'-Present'

- Led product design for multiplayer and live casino games, including live dealer roulette, multi-seat blackjack, and poker, with a focus on social engagement, player presence, and interactive shared experiences
- Provided ongoing mentorship to UX designers and external partners, offering feedback on usability, player habits, and UX systems while fostering inclusive, player-first design practices
- Defined UX patterns and flows for real-time player interactions, table seatings, presence indicators, in-game chat, and dynamic dealer prompts to enhance community feel and player retention
- Designed cross-platform interfaces and tools supporting development of 50+ exclusive casino games across mobile and web
- Partnered closely with UI artists to align on game presentation, layout systems, and game feel ensuring cohesive, player oriented experiences across platforms
- Organized and exported art assets, imported assets into game engine, set up UI layout in Unity, hooked up game events in code, and built and tested each game
- Shaped scalable game development workflows and tooling interfaces in collaboration with product managers and engineers
- Conducted and led user research and usability testing on casino games to inform iterative and effective design changes
- Acted as product owner for over 15 games, managing roadmap delivery, regulatory alignment, testing cycles, and visual consistency
- Established UX guidelines and working templates to maintain consistent user experiences across all DraftKings casino games and external developers

NeuroScouting Lead UI/UX & Visual Designer

Somerville, MA

May 14'-Aug 21'

- Owned end-to-end UX and visual design across multiple iOS, mobile, PC, and VR applications
- Designed and created hundreds of UI flows, wireframes, mockups, and screen functionality for full suite of interactive digital applications
- Regularly iterated on custom interface improvements and visual changes based on client requests and feedback for yearly software releases and smaller updates throughout the year
- Built and tested immersive VR experiences, collaborating with engineering to integrate UX systems directly into real-time environments
- Established asset pipelines for UI, 3D models, VFX, and animations
- Crafted and rendered hundreds of UI art assets, icons, animations, visual FX, particle systems, 3D models and environments, and textures for various projects and interactive experiences
- Managed outsourced projects and coordinated with outsource teams/individuals to maintain high quality deliverables and adherence to UX and visual standards

EDUCATION

BS Interactive Media and Game Development

Worcester Polytechnic Institute
Worcester, MA

Aug 09'-May 13'
